Innovative Air Treatment

Ozone technology for demanding environments

Innovative Air Treatment

ozone technology - solutions that work for your business

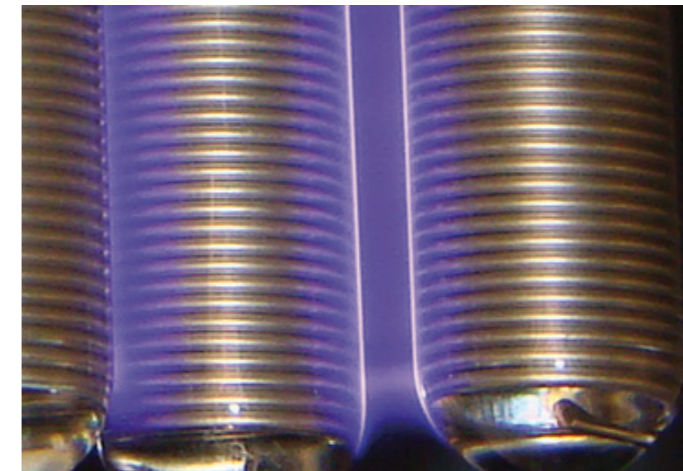

Interzon AB

Interzon AB develops and manufactures advanced ozone generators for industrial and professional use.

Durability and reliability at reduced costs are the key words for all of our products and together they form the base of our product portfolio.

In more than ten years of development, we offer the market's most advanced technology, CGC, for production of ozone.

The main office is located in Täby north of Stockholm where R&D, sales and service are located.

leading ozone technology

unique advantages

Our Business Concept

is to develop, manufacture and sell ozone generators that will increase and improve our customers safety, economy and environment.

Our customers are offered solutions based on leading ozone technology and an unique application know-how.

Our Vision

is to be the leading trademark and one of the central operators in Europe in development and production of ozone generators for industrial and professional use.

"state of the art" ozone generators

CGC - Corona Glass Cell

The CGC (Corona Glass Cell) was designed to meet the market requirements and has been developed and improved in close cooperation with our customers in highly demanding environments.

The CGC technology is found in our trademark AirMaid® and in a number of OEM products.

CGC, a swedish developed technology, has been on the market since 1996.

- ✦ High efficiency and performance
- ✦ Stable ozone production
- ✦ No material consumption
- ✦ Low power consumption

Field Of Application

Our technology is used in applications where quality, long operation lifetime and sustainable environment are required.

- ✦ Kitchen exhaust ducts
- ✦ Sewage wastewater treatment
- ✦ Sanitizing
- ✦ Waste rooms
- ✦ Waste compactors

Ozone (O₃)

O₃ is a colourless triatomic molecule, consisting of three oxygen molecules.

O₃ can be produced by corona discharge or ultraviolet light.

The smell of ozone can generally be detected by the human nose at concentrations of 0,02 ppm to 0,05 ppm.

Ozone is not combustible.

Local recommendations for using ozone should be observed.

Airmaid® Products

All products are sold under Interzon's own trademark AirMaid®.

AirMaid® offers an advanced and environmentally friendly technology for ozone production, which is appreciated by its users, which gives priority to safety, economy and environment.
